PROFILE

Software Developer with experience in web and full-stack development using Java, Spring Boot, Angular and MySQL. Currently responsible for the maintenance and evolution of the CRM at Meditec S.R.L., implementing scalable backend services and frontend features. I use AI assistants integrated into the development environment in daily work with the project codebase, to navigate existing code, analyse relationships between classes and components, propose changes and review implementations. Continuous training in full-stack development and AI implementation.

PROFESSIONAL EXPERIENCE

Software Developer - Meditec S.R.L.

Sept. 2025 - Present

Buenos Aires, Argentina

- Maintenance and evolution of the corporate CRM: Java and Spring on the backend, Angular 15 (Angular Material, Material Icons, AG Grid) on the frontend and MySQL as the database.
- Implementation of scalable backend architecture and services handling the CRM business logic.
- Use of AI assistants integrated into the IDE to navigate existing code, understand relationships between classes and components, propose changes and review implementations before integrating them.
- Library integration and version control with Git and GitHub in an agile working environment, organising team work with HacknPlan.

Full Stack Developer - Polo IT (Pet Portal, MVP)

March2025-August2025

Accelerator programme - Collaborative project

- MVP development with React, Python, Flask, MySQL, Toastify and SweetAlert2.
- Work in a multidisciplinary team of 8 (frontend, backend, QA, design and mentoring), with active participation in every phase of development.
- Agile project management with Jira.

Data Entry - La Ley S.A.

2004 - 2014

- Processing, proofreading and digitisation of legal and administrative texts at high volume, focused on accuracy and data quality.
- Coordination across departments to keep documents circulating and up to date.

TECHNICAL SKILLS

Backend	Java · Spring Boot · Spring Security · JWT · APIs REST · Python · Flask
Frontend	Angular 15 · Angular Material · AG Grid · React · Bootstrap · Tailwind CSS · HTML · CSS · JavaScript
Database	MySQL · PostgreSQL · NoSQL · Firebase
Applied IA	Claude Code, Windsurf, Gemini, ChatGPT, Kimi, Blackbox, v0.app: code analysis and navigation, proposing changes, reviewing implementations
Tools	Git · GitHub · IntelliJ IDEA · VS Code · Postman · Insomnia · Swagger · Jira · Trello · HacknPlan · Vercel · Netlify
Methodologies	implementation of AI in real projects

EDUCATION & TRAINING

. Universidad Nacional del Oeste	2023 - Present
. CareerTech IA	2026
implementation of AI in real projects	
. Alura Latam - Oracle Next Education	March 2025
Java and Spring AI implementation TechAI Career Week. Java 21, Spring Boot, Security, JWT, MySQL, NoSQL, PostgreSQL, Postman, Insomnia, Swagger, IntelliJ, Git, GitHub, Vercel.	
. Codo a Codo 2.O - Python	2024
Python, Flask, MySQL, HTML, CSS, JavaScript, Bootstrap, Firebase, PythonAnywhere, Git, GitHub.	
. Universidad Tecnológica Nacional - ReactJS	2023 - 2024
HTML, CSS, JavaScript, Bootstrap, Git, GitHub, Firebase.	
. Udemy - Java and AngularJS	
Java, Spring Boot, Spring Security, JWT, MySQL, PostgreSQL, Angular, Angular Material, Tailwind CSS, Postman.	
. Universidad Nacional de La Punta - Full Stack Java	2021- 2022
Java 8, MySQL, NetBeans, GitHub.
